FEDERAL BUDGET 2021

On February 10, 2020, President Trump released his proposed budget for fiscal year 2020-2021 that begins on October 1, 2020. The proposal includes deep cuts to Medicare and Medicaid, two core programs providing access to healthcare for people with disabilities and seniors. Typically, Congress does not adopt the President's budget but develops its own proposals. The President's budget is available at https://www.whitehouse.gov/omb/budget/ . Congress has not acted upon the appropriations bills during the COVID-19 response. The May 2020 budget deficit has grown to $399 billion which is nearly double over one year ago and reflects a year-to-date total of $1.88 trillion. The Treasury Department cites the stimulus spending plus a 25% drop in revenues.

CENSUS 2020

Reminder: fill out your 2020 Census information!

Every 10 years the government counts everyone across the country to gather information to make decisions about funding for services and program. The census is also used to determine the number of members of Congress in the House of Representatives for each state. Each state is given a specific number of Congress members based upon the number of people who live in each state. It is important to participate in the 2020 Census so that the government can get an accurate count on the population. One person in each household will need to fill out the form. The final deadline for the Census is October 31, 2020. The form can be filled out online, by phone, or by mail. There are guides to help people with disabilities fill out the census. If you have questions, you can call 1-800-923-8282 or go to www.2020census.gov .
